

Kritika Mandale

AI/ML Engineer

📍 Nagpur, India ✉ kritikamandale1421@gmail.com ☎ +91 96996 77543 in kritikamandale 🌐 kritikamandale

Summary

AI/ML Engineer and Computer Science undergraduate with 6+ months of industry experience, skilled in machine learning and NLP using Python, TensorFlow, Keras, Scikit-learn, and FastAPI. Experienced in building and deploying end-to-end ML pipelines, epidemiological forecasting models, and biometric authentication systems. Proven impact through a fintech internship and national-level hackathon recognition. Seeking an AI/ML Engineer role to deliver intelligent, data-driven solutions at scale.

Education

B.Tech in Computer Science and Business Systems

St. Vincent Pallotti College of Engineering and Technology, Nagpur

Aug 2023 — Present (3+ years)

CGPA: 9.41 (Current)

Experience

Full Stack Developer Intern | Trust Fintech, Nagpur

Aug 2025 — Jan 2026 , 6 mos

- Architected and deployed an end-to-end KYC verification pipeline using SQL for secure data storage, retrieval, and compliance management, reducing manual processing effort by 35%.
- Engineered a face authentication module using Python, automating identity verification and cutting review time by 40%.

Projects

Epidemic Spread Prediction — AI Decision Support System (2025)

[🌐 Live Demo](#)

- Built an end-to-end epidemic forecasting system combining LSTM and ARIMA models achieving 92% prediction accuracy for 7—14 day outbreak forecasting; integrated SEIR compartmental modeling and SHAP-based explainability across a Streamlit dashboard with Folium risk maps and Rt analysis across 50+ countries.

SecureID — AI-Powered Student Verification Platform (2026)

[🔗 GitHub](#)

- Developed a biometric facial authentication system using DeepFace and OpenCV integrated with a FastAPI backend and React.js frontend; implemented JWT-based role-based access control across 3 user roles, cutting verification time by 60%.

Skills

AI/ML: Machine Learning, NLP, BERT, LSTM, ARIMA, Generative AI, Feature Engineering, TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, NumPy, SHAP, Optuna.

MLOps and Deployment: FastAPI, Docker, REST APIs, Streamlit.

Data and Visualization: SQL, MongoDB, EDA, Plotly, Matplotlib, Seaborn, Folium.

Languages: Python, SQL, JavaScript, C, C++.

Tools and Platforms: Git, GitHub, Postman, Jupyter Notebook, VS Code, Linux CLI, OpenCV, DeepFace.

Achievements

National Finalist — Hackwise 2026, IIM Indore (National Level Hackathon)

Jan 2026

First Runner-Up — Openpools (Doppelganger 30-Hour Hackathon)

Aug 2025

First Runner-Up — NASA Space Apps Challenge, Nagpur Chapter

Oct 2024

Positions of Responsibility

Career Development Coordinator (CDC) | CSBS Department Club, SVPCET

Jan 2025 — Present

Facilitated career guidance, placement preparation, and student representation for the CDC cell.

Co-Coordinator | Hackronyx — National Level Hackathon

Apr 2025 — Jun 2025

Managed end-to-end event planning, team coordination, and logistics for a 250-participant national hackathon.

Volunteer | Vijnana Bharati

Supported organization of Science Outreach programs and contributed to community STEM education initiatives.

Certifications

Intro to Machine Learning — Kaggle

Feb 2026

Data Analysis with Python — freeCodeCamp

Jul 2025

Joy of Computing using Python — NPTEL (IIT Madras)

Oct 2024
