Summary

Computer Science undergraduate with experience in AI/ML and Full Stack Development, national-level hackathon wins, and case competition finishes. AI/ML Intern at Matverse Vision, building satellite-based irrigation prediction models using Python and machine learning. Skilled in computer vision, recommendation systems, and biometric authentication using Next.js and FastAPI.

Education

B.Tech in Computer Science and Business Systems

St. Vincent Pallotti College of Engineering and Technology, Nagpur

Aug 2023 — Present

CGPA: 9.50 (Current)

Experience

AI/ML Intern | Matverse Vision Pvt. Ltd.

Mar 2026 — Present

- Built a 7-stage irrigation prediction pipeline using ERA5, SMAP, and Random Forests.
- Improved irrigation predictions with PINNs, achieving 97.1% accuracy, 98.9% precision.

Web Developer Intern | Trust Fintech Ltd, Nagpur

Jun 2025 — Jan 2026 (7 months)

- Architected an end-to-end KYC verification pipeline using SQL for secure data storage and compliance management, reducing manual processing effort by 35%.
- Built a biometric face authentication module using Python and OpenCV, reducing verification time by 40%.

Projects

Skinest - AI Skin Analysis Platform (2026)

[GitHub](#)

- Developed an AI-powered skincare platform using Next.js, FastAPI, and PostgreSQL for real-time facial analysis and personalized skincare recommendations.
- Built a recommendation engine, achieving 95% accuracy across 15+ skin conditions while reducing assessment time by 60% with a privacy-first pipeline.

Milap - AI-Powered Event Hosting Platform (2026)

[GitHub](#)

- Developed an AI-powered event hosting platform using Next.js, TypeScript, and Tailwind CSS with a Groq AI planning assistant and role-based access control, reducing event planning time by 50%.

Skills

Languages: C, C++, Python, SQL.

AI/ML: Computer Vision, OpenCV, Feature Engineering, TensorFlow.js, Keras.

Frontend: Next.js, Tailwind CSS, HTML/CSS.

Backend & Databases: FastAPI, PostgreSQL, REST APIs.

Tools and Platforms: Git, GitHub, Postman, Jupyter Notebook, VS Code, Linux, Streamlit, Kaggle.

Positions of Responsibility

Career Development Coordinator (CDC) | CSBS Department Club, SVP CET

Jan 2025 — Present

Facilitated career guidance, placement preparation, and student representation for the CDC cell.

Co-Coordinator | HackronyX — National Level Hackathon

Apr 2025 — Jun 2025

Managed end-to-end event planning, team coordination, and logistics for a 250-participant national hackathon.

Volunteer | Vijnana Bharati

Supported organization of Science Outreach programs and contributed to community STEM education initiatives.

Achievements

National Finalist — Hackwise 2026, IIM Indore (National Level Hackathon)

Jan 2026

First Runner-Up — Openpools (Doppelganger 30-Hour Hackathon)

Aug 2025

Second Runner-Up — OpVasion'26, IIT Delhi (Case Competition)

March 2026

First Runner-Up — NASA Space Apps Challenge, Nagpur Chapter

Oct 2024

Certifications

Intro to Machine Learning — Kaggle

Feb 2026

Data Analysis with Python — freeCodeCamp

Jul 2025

Joy of Computing using Python — NPTEL (IIT Madras)

Oct 2024
